

1

PERMA  BOND

PermaBond is an extremely aggressive acrylic bonding agent for use with Gulf Synthetics coatings. PermaBond offers a unique molecular fusion with wood and concrete surfaces that are severely weathered or have layers of previous coatings that are questionable.

- Penetrates wood and concrete
- Enhances adhesion
- Can be colored to any color by adding 1 quart of exterior latex paint.
- Use a brush, roller, or paint sprayer
- VOC free and non-toxic

2

PERMA  FILL

The only expandable wood filler on the market that offers a permanent solution for filling cracks and knotholes in wood. Properly preps distressed wood before resurfacing. Dries quickly so projects can be completed faster. Provides a smooth finish for worn decks and docks prior to restoration with DeckRevive or DockRevive.

- Seals cracks and knotholes
- Expands to fill voids
- Will not shrink
- Applies with putty knife
- VOC-free, non-toxic

Tired of repetitive maintenance and costly replacement?

GULF SYNTHETICS

PROTECTIVE COATINGS ▲ SYNTHETIC SHEETPILE

At Gulf Synthetics, we are committed to creating innovative, superior, and environmentally safe, maintenance solutions — for the homeowner, the professional contractor, and the marine industry.

Welcome to Gulf Synthetics. We invite you to discover our unique coatings for protecting and resurfacing wood, concrete, and marine docks. Our coatings provide long-lasting, maintenance-free, and eco-friendly solutions for outdoor surfaces. Gulf Synthetic coatings will revive and protect decks, docks, concrete walkways, ramps, porches, steps, pool decks, patios, driveways and aging asphalt.

Our Science:

Why do our coatings perform so well? Gulf Synthetics Coatings are different because of our patented dry chemistry combined with ultra adhesion acrylic based polymers. The combination of our chemistry allows the coating to be extremely breathable so that water can evaporate from the wood substrate or concrete and pass through our coating. The more breathable a coating, the longer it will last.

SYNTHETICS**

Brings That Deck Back To Life

A durable, non-fading, eco-friendly coating that protects wood from the constant expansion and contraction cycle that destroys wood. Mixes with any color, exterior 100% acrylic latex gloss paint. Transforms decks, boardwalks, steps and other treated lumber surfaces.

- ✓ Fills cracks
- ✓ Covers stains
- ✓ Locks down splinters
- ✓ Seals metal hardware
- ✓ Slip and stain resistant
- ✓ Fire and scuff resistant
- ✓ Applies with everyday paint tools
- ✓ Water based and non-toxic

PermaBond Primer is recommended over pre-painted, redwood, soft cedar, and extremely cracked or weathered deck boards.

Revitalizes Tired Surfaces

A non-toxic micro topping that resurfaces and transforms concrete and aging asphalt. Mixes with any color, exterior 100% acrylic latex gloss paint to achieve color matching and create decorative patterns and designs. Revitalizes pool decks, patios, porches, steps, walkways, driveways and concrete docks.

- ✓ Covers stains
- ✓ Fills cracks
- ✓ Slip resistant texture
- ✓ Stain and scuff resistant
- ✓ Applies with brush or roller
- ✓ Tools clean up with water
- ✓ Dries quickly

PermaBond Primer is recommended over previously painted concrete.

Protects Waterfront Investments

A highly textured, polymer coating designed specifically for restoring wood docks, gangways, boardwalks and more. Mixes with any solid color 100% acrylic latex stain and applies with ordinary paint tools. Quick setting for minimal time out of service. Safe for marine environments.

- ✓ Locks down splinters
- ✓ Seals metal fasteners
- ✓ Fills cracks
- ✓ Non-fading
- ✓ Slip and stain resistant
- ✓ Fire and scuff resistant
- ✓ Tools clean up with water
- ✓ Perma Bond Primer is included in Dock Revive Kits
